

GUIDE v.46.2 0.250-SE piecewise-stepwise linear least-squares regression tree (constant fitted to incomplete cases in terminal nodes) for predicting **BodyfatB**. At each split, an observation goes to the left branch if and only if the condition is satisfied. Sample size (in *italics*) and mean of **BodyfatB** printed below nodes. Terminal nodes with means above and below value of 18.94 at root node are painted yellow and purple respectively.
