

GUIDE v.46.2 importance scoring classification tree for predicting DISEASE_TYPE using estimated priors and unit misclassification costs. At each split, an observation goes to the left branch if and only if the condition is satisfied. Symbol ' $\leq_*$ ' stands for ' $\leq$ or missing'. V1 = TUMOR_MEAN_COVERAGE. V2 = IGHV_MUTATION_STATUS. V3 = TUMOR_MEAN_COVERAGE. V4 = NORMAL_MEAN_COVERAGE. Predicted class and sample size (in *italics*) printed below each terminal node; class posterior probabilities for DISEASE_TYPE = CLL and MBL beside node.
